

FOR IMMEDIATE RELEASE

TRG Packaging and Display Solutions and BHS Corrugated Mark Successful Launch of First BHS Jetliner Xceed in the United States

June 25, 2026 – Following the initial announcement of TRG Packaging and Display Solutions' investment in the BHS Jetliner Xceed, a major milestone has now been reached: TRG, one of the nation's largest independent corrugated packaging and display manufacturers, and BHS Corrugated, the world's leading provider of solutions for the corrugated industry, are celebrating the successful installation and full operation of the first BHS Jetliner Xceed digital preprint press in the United States.

Installed at TRG's facility in Zionsville, Indiana, the BHS Jetliner Xceed represents the collaborative partnership between the two companies to bring industrial-scale digital preprint technology to the North American corrugated market.

Together, TRG and BHS Corrugated have transformed an ambitious vision into a production-ready platform. Unlike traditional approaches that require individual facilities to maintain their own high-graphic print capabilities, TRG's centralized preprint model distributes digitally printed rolls and sheets across its converting network, extending advanced digital printing capabilities throughout its 24 facilities. As a result, the BHS Jetliner Xceed helps TRG meet growing customer demand for faster turnaround times, greater SKU flexibility, and more agile packaging programs.

"The successful launch of the Xceed is a significant step forward for TRG, our customers, and the industry," said Kevin Miller, CEO of TRG Packaging and Display Solutions. "By combining this game-changing technology with our manufacturing network, we're delivering new levels of speed, flexibility, and graphic capability."

"This achievement highlights the strong partnership between BHS Corrugated and TRG," said Greg Grdinich, Chief Sales Officer - NASA (North America / South America) at BHS Corrugated. "Together, we are showing how advanced digital print technology can be successfully implemented in a demanding production environment." Nils Gottfried, Senior Sales Manager Digital Print at BHS Corrugated, added: "Seeing the first Xceed in the U.S. enter production is an exciting milestone and a clear sign of how digital print innovation can deliver measurable performance on the production floor."

The successful launch of the BHS Jetliner Xceed demonstrates what can be achieved when innovative technology and operational expertise come together. By combining BHS's advanced digital printing solutions for corrugated with TRG's national manufacturing footprint, the two companies are revolutionizing how corrugated packaging is produced and delivered.

About TRG Packaging and Display Solutions

TRG Packaging and Display Solutions is one of the nation's largest independent corrugated packaging and display manufacturers with over 100 years of innovation. From more than 30 locations nationwide, TRG provides solutions ranging from industrial brown box shipping containers to high-end graphic packaging, in-store displays, packaging supplies, and pack-out and fulfillment services. About BHS

BHS Corrugated Maschinen- und Anlagenbau GmbH is the leading solution provider in the corrugated industry. With more than 3,100 employees at its headquarters in Weiherhammer, Germany, and in more than 20 countries worldwide, the Lifecycle Partner is consistently strong across its entire range of products and services. This includes the areas of corrugating machinery, corrugators and corrugated box plants, Industry 4.0, logistics and Single-pass Inkjet digital printing. Customers receive end-to-end solutions – from development and production to installation and maintenance through to a wide range of innovative service solutions.

Under the motto “Corrugated 4.0”, the company is driving forward the digitalization of the corrugated industry in a targeted manner – with a focus on automation, efficiency and data-driven process optimization. BHS Corrugated reinvests almost five percent of its turnover in research and development in order to meet customer requirements as precisely as possible and to keep its finger on the pulse of technology.

As one of the largest employers in the region, the company offers a wide range of career opportunities and a comprehensive range of employer benefits. BHS Corrugated fulfills its corporate responsibility through a wide range of ESG measures and by supporting social projects. These include the family foundation “Angels for Children” (AfC), which promotes education in Laos, and the “Lars and Christian Engel (LUCE) Trust”, which supports technological and economic development in the region.
